

# Picture Layout

Our assignment was to create a simple 4 page picture layout so we can get used to working with InDesign. Since the program is similar to Photoshop and Illustrator I got my bearings quickly. My idea was something like travelling journal with memories. In the first 2 pages I put photos from Glow that I took last year. I didn't have any idea about the design of the pages and started playing with it. The best one of my ideas was to put frames with colours from the pictures underneath them so they can compliment the photos. The frames turned out to look like lines connecting the photos. On the second 2 pages I put pictures from my trip to Essen this year. Again the design is consistent, simple, but colourful in some way.
