Color Schemes Poster

This is the poster I created. It was fully inspired by Bulgarian style of pottery. I decided to recreate the exact pattern of the little jug I found. I colour-picked the colours from the picture of the jug and used them in the poster. It was the first time I used Photoshop and I was wondering how should I recreate it.

I used frames and the smudge tool, because my first idea to somehow "drag" the colours, not smudging them didn't, actually worked. After I was ready with the pattern I found similar to the font used on the jug and it matched perfectly. Finally it looked a bit unfinished and I decided to put the picture of the jug in the poster and it fit.
